Calculated landing — uniform 070° true / 21 kt wind
Synthetic entry/corridor; uncalibrated aircraft; no historical terrain-clearance claim
Constructed ground track
Right of runway (m)
Distance from runway threshold (m)
Touchdown
Stop: 553 m remain
Threshold 41.2s → touchdown 45.4s
Height above runway (m)
Seconds from model entry
Fixed braking law → stop at 96.6s
Horizontal ground speed (kt)
Seconds from model entry
Finite-rate airborne turn
Bank angle (degrees)
Seconds from model entry
